Summary

I have around 3 years of hands-on experience working with MS SQL. I am skilled in solving technical problems, working with databases, and helping clients with their system issues. I have good communication skills and can work well with both technical teams and clients. Now, I am focusing on building my career in Software Engineer. I am learning Java Spring Boot and improving my skills to become a software engineer. I am eager to use my experience and new knowledge to grow in this field.

Professional Experience

MiHCM Bangladesh PVT LTD: *Senior Cloud Solution Specialist*

12/2022 - Present *Hybrid*

- Designed and developed customized reports in MS SQL & Visual Studio based on diverse client requirements.
- Migrated and integrated large volumes of employee data into SQL Server databases, ensuring accuracy and consistency.
- Implemented client-specific HR policies (leave, attendance, benefits, payroll structures) within database-driven applications.
- Developed and optimized stored procedures, functions, and queries to automate HR processes and improve system performance.

Princeton Prep: *IT Expert (Part Time)*

09/2021 - 10/2022 *Onsite*

- Provided technical support for office hardware, software, and network systems, ensuring uninterrupted operations
- Installed, configured, and maintained computers, printers, and office applications for staff use.
- Managed system security, updates, and troubleshooting while coordinating with vendors for IT maintenance.
